

Assignment 1

CS590-HCC (Human-Centered Computing), Spring 2020, Purdue University

Due: 11:59pm January 19

Submit to Blackboard

Complete at least 3 different tasks on Amazon Mechanical Turk (<https://www.mturk.com/>), Figure Eight (<https://www.figure-eight.com/>), microWorkers (<https://www.microworkers.com/>), or Clickworker (<https://www.clickworker.com/>) to earn at least \$0.25.

1. For each task that you've completed, complete the following information.
 - Name of the task
 - Screenshot of the task interface
 - A brief description of what you have done in the task
 - The price of the task
 - The number of such task you've completed
2. For each task that you have completed, make a guess about why you are asked by the requester to solve that task. (i.e., what do you think your data in that task will be used for?)
3. For each task that you have completed, comment on your experience in that task. Do you like the way the task is designed? In your opinion, what are the strengths and drawbacks of the design of each task? (For example, why did you decide to work on that task? Is there anything in the task that you find confusing? Do you get enough time working in that task? Is there any part in the task that you think needs improvement?)
4. (Bonus: 1 point) If you have completed tasks from more than one platform, do you notice any differences between various platforms on what kind of tasks are available? What are the strengths and drawbacks of the interfaces of different platforms? How do different platform evaluate your "reputation" as a worker?
